

IHCAb™ Somatostatin (BGT232) Mouse mAb

Cat #: B-IMW4014

Size: 100 µL

Storage: Store at -20°C. Avoid repeated freeze / thaw cycles.

Background

The hormone somatostatin has active 14 aa and 28 aa forms that are produced by alternate cleavage of the single preproprotein encoded by this gene. Somatostatin is expressed throughout the body and inhibits the release of numerous secondary hormones by binding to high-affinity G-protein-coupled somatostatin receptors. This hormone is an important regulator of the endocrine system through its interactions with pituitary growth hormone, thyroid stimulating hormone, and most hormones of the gastrointestinal tract. Somatostatin also affects rates of neurotransmission in the central nervous system and proliferation of both normal and tumorigenic cells.

Product Information

Applications/Dilution: IHC-p 1:200-400

Isotype/Source: Monoclonal Mouse IgG2b, Kappa

Specificity: The antibody can specifically recognize human Somatostatin protein

Subcellular Location: Cytoplasmic

Expression: Pancreas

Formulation: PBS, pH7.2, 0.03% Porcolin 300, containing stabilizing protein

Storage: Store at -15°C to -25°C

Fig. Human pancreas tissue was stained with Anti-Somatostatin Antibody
