

IHCAb™ Cytokeratin 18 (BGT-CK18) mouse mAb

Cat #: B-IMW6166

Size: 100 µL

Storage: Store at -20°C. Avoid repeated freeze / thaw cycles.

Background

KRT18 encodes the type I intermediate filament chain keratin 18. Keratin 18, together with its filament partner keratin 8, are perhaps the most commonly found members of the intermediate filament gene family. They are expressed in single layer epithelial tissues of the body. Mutations in this gene have been linked to cryptogenic cirrhosis. Two transcript variants encoding the same protein have been found for this gene.
