Biogradetech

IHCAb™ Napsin A mouse mAb (PT2252)

Cat #: B-IMW6695

Size: 100 uL

Storage: Store at -20°C. Avoid repeated freeze / thaw cycles.

Background

This gene encodes a member of the peptidase A1 family of aspartic proteases. The encoded preproprotein is

proteolytically processed to generate an activation peptide and the mature protease. The activation peptides of

aspartic proteinases function as inhibitors of the protease active site. These peptide segments, or pro-parts, are

deemed important for correct folding, targeting, and control of the activation of aspartic proteinase zymogens. The

encoded protease may play a role in the proteolytic processing of pulmonary surfactant protein B in the lung and may

function in protein catabolism in the renal proximal tubules. This gene has been described as a marker for lung

adenocarcinoma and renal cell carcinoma.

Product Information

Applications/Dilution: IHC-p 1:100-500. IF 1:50-200

Isotype/Source: Mouse, Monoclonal/IgG1, Kappa

Specificity: This antibody detects endogenous levels of human Napsin A. Heat-induced epitope retrieval (HIER)

TRIS-EDTA of pH9.0 was highly recommended as antigen repair method in paraffin section

Subcellular Location: Secreted

Expression: Expressed predominantly in adult lung (type II pneumocytes) and kidney and in fetal lung. Low levels in

adult spleen and very low levels in peripheral blood leukocytes

Formulation: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Storage: Store at -15°C to -25°C

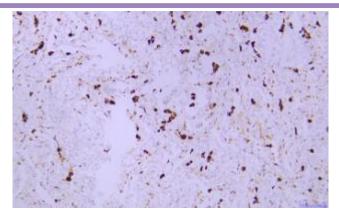

Fig. Immunohistochemical analysis of paraffin-embedded human lung Antibody was diluted at 1:200(4° overnight).
