

IHCAb™ p120 Catenin (BGT082) Mouse mAb

Cat #: B-IMW6977

Size: 100 µL

Storage: Store at -20°C. Avoid repeated freeze / thaw cycles.

Background

catenin delta 1(CTNND1) Homo sapiens This gene encodes a member of the Armadillo protein family, which function in adhesion between cells and signal transduction. Multiple translation initiation codons and alternative splicing result in many different isoforms being translated. Not all of the full-length natures of the described transcript variants have been determined. Read-through transcription also exists between this gene and the neighboring upstream thioredoxin-related transmembrane protein 2 (TMX2) gene.

Product Information

Applications/Dilution: IHC-p 1:200-400, WB 500-1000

Isotype/Source: Monoclonal Mouse IgG2b, Kappa

Specificity: The antibody can specifically recognize human p120 catenin protein. In western blotting of HeLa, A431 and HEK293 cell lysates, the antibody can label a band with molecular weight around 100~110 kDa

Subcellular Location: Cytoplasmic, Membranous

Expression: Breast/ Tonsil

Formulation: PBS, pH7.2, 0.03% Porcolin 300, containing stabilizing protein

Storage: Store at -15°C to -25°C
