CITED2 Polyclonal Antibody

Order Information

Catalog#	BGT-ANT-62108
Size/Concentration	100µl

Description

The protein encoded by this gene inhibits transactivation of HIF1A-induced genes by competing with binding of hypoxia-inducible factor 1-alpha to p300-CH1. Mutations in this gene are a cause of cardiac septal defects. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
