

## 10 mM HCl (pH2.0, sterile)

Cat #: C-CYP401

Size: 1.0 mL, 1.5 mL

Shipping: Blue Ice

### Product Overview

This product is sterile, colorless, and transparent, with no foreign matter, and is used for resuspending the TGF- $\beta$  series of recombinant cytokines.

The product can be used to resuspend lyophilized TGF- $\beta$  series recombinant cytokines in powder form. The recommended dissolution concentration is not less than 100  $\mu\text{g}/\text{mL}$  and not more than 1  $\text{mg}/\text{mL}$ . After adding an appropriate volume of 10 mM HCl to the recombinant cytokine product, it should be left at room temperature for at least 20 minutes to fully dissolve. Do not vortex or vigorously shake.

### Product Information

**Sterile:** Ready-to-use, sterilized by 0.1  $\mu\text{m}$  filtration

**Application:** Reconstitution of lyophilized powder of TGF- $\beta$  series recombinant cytokines

**Storage:** Room temperature or 2-8°C, for 1 year

### Note

The reagent is only used in the field of scientific research, not suitable for clinical diagnosis or other purposes.
