

Pulldown™ HRP, Goat Anti-Mouse IgG HCS

Cat #: D-AKE25112

Size: 100µl / 500µl

Storage: Store at -20°C. Avoid repeated freeze / thaw cycles.

Background

Biogradetech secondary antibodies are available conjugated to enzyme, biotin or fluorophore for use in a variety of antibody-based applications including Western Blot, ImmunoHistoChemistry, ImmunoFluorescence, Flow Cytometry and ELISA. We offer high quality secondary antibodies from goat, rabbit and donkey sources for your each application.

Product Information

Applications: WB, IP

The suggested dilution ratio is: WB: 1:1,000-1:10,000 (1:2000 optimal), IP: 1:1,000-1:10,000 (1:2000 optimal). In rare cases, due to the degradation of heavy chains, there are weak bands at 25kDa. It is recommended to use the following method to reduce the non-specific interference background: Increasing the concentration of target protein in the sample, reducing the use of primary antibody in Pull Down, or optimizing the dilution of WB antibody and ECL exposure conditions.

Isotype: Goat IgG

Reactivity: Mouse

Formulation: Liquid

Concentration: 0.5 mg/ml

Storage: Store at -20°C. Avoid repeated freeze / thaw cycles.

Storage Buffer: Liquid in PBS, pH 7.4, containing 1% BSA as stabilizer and 50% Glycerol.

Storage Instructions: Stable for one year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing.

Note:

The product listed herein is for research use only and is not intended for use in human or clinical diagnosis.

Example: Sample: Mouse IgG, Dilution factor: 1:2000, Exposure time: 45 s
